

WILD10 Delegates: Tell the story of your WILD place!

Europe is becoming a wilder place, and that's why WILD10 will convene there. Even on the world's most densely populated continent, wild nature & human society can have a new relationship. This idea of a new, wilder, reborn Europe can create a true feeling of European identity and it can start a new global movement for nature and wilderness. Wilderness is an old resource for a new and wilder world!

We are very excited to launch our first WILD10 GeoStory! The locations in this GeoStory are just a few examples of the many wild places found throughout the world. We want to know...do you live in a WILD place? Show us through images, video, audio, text and mapping location!

Instructions on how to submit your GeoStory:

Please set up and send the following information in an email to geostories@wild10.org. *Failure to follow instructions will result ineligibility to be featured on this GeoStory platform.*

*All photographs must be submitted as jpeg attachments

*Submit all narrative text and photo files/caption/credit information in a Word document

*Do not submit any content that is not your own or that you do not have permission to use!

*Selected submissions will be featured on the GeoStory platform

1. Narrative:

- a) Title (based off of the location)
- b) Descriptor text that explains the location, landscape, experience, how this area exemplifies a "wilder world", etc. *1-2 paragraphs only!*
- c) Appropriate links for more information

2. Between 4-9 multimedia pieces:

- a) **Photographs** sized at 800 x 600 pixels with photographer credits and captions under 225 characters. *Please specify which image should be paired with its appropriate photo caption in the Word document!*
- b) **Video** files (Vimeo or YouTube links preferred, actual files are acceptable). Please include a title, description and appropriate credits.
- c) **Audio** files with a title, description and appropriate credits.

3. Location:

- a) Please provide the latitude and longitude coordinates for ONE location only. For example: Tatra National Park in Slovakia: latitude: 49.172074 longitude: 19.961532. Or, Kayapo Indigenous Reserve in Brazil: latitude: -1.537901 longitude: -50.471191
